SCOTT H. IRWIN
BIOGRAPHY
December 2014

Dr. Scott H. Irwin holds the Laurence J. Norton Chair of Agricultural Marketing in the Department of Agricultural and Consumer Economics (ACE) at the University of Illinois at Urbana-Champaign.

Irwin is a national and international leader in the field of agricultural economics. His research on agricultural markets is widely-cited by other academic researchers and is in high demand among market participants, policymakers, and the media.

Irwin is best known for his work on the impact of speculation in commodity markets. He has been an active participant in the world-wide debate about the market impact of financial index investment in commodity markets, popularly known as “financialization.” Irwin has published numerous academic articles on the subject and has been called upon to provide testimony before the U.S. Congress, the OECD, and the CFTC, as well as publishing op-ed articles in the New York Times and Washington Times. He has been invited to make presentations to numerous international organizations such as the WTO, FAO, World Bank, International Energy Agency, and International Institute of Finance.

Irwin is also a well-known innovator in the development of agricultural extension programs that have helped hundreds of thousands of farmers in Illinois, the U.S. and throughout the world make more informed production, marketing, and financial decisions. His leadership and vision have been the driving force behind the award-winning farmdoc project at the University of Illinois since its inception in 1999. The farmdoc website is an extremely popular “one-stop source” of farm-level decision-making information. He recently led the development of farmdoc daily, which has the unprecedented and ambitious goal of publishing one original research-based article each day. The articles on farmdoc daily have quickly earned a place on the “must read” list of farmers, educators, journalists, traders, market analysts, and policymakers around the globe.

Irwin is a member of the Agricultural and Applied Economics Association (AAEA) and was named a Fellow in 2013, the highest honor bestowed by the Association. He has also received the AAEA Distinguished Group Extension Program Award (twice) and the Quality of Communication Award. He has served the AAEA in numerous capacities and was an elected member of both the AAEA Executive and Foundation Boards. Other honors include the Paul A. Funk Recognition Award and the Team Award (three times) from the College of Agricultural, Consumer, and Environmental Sciences at the University of Illinois at Urbana-Champaign.

Irwin earned a bachelor’s degree in agricultural business from Iowa State University and both an M.S. and a Ph.D. in agricultural economics from Purdue University. He currently teaches courses on commodity price analysis and futures and options market research. His lifelong fascination with commodity markets started as a young boy tagging along with his father to check the latest prices from ‘Chicago’ at the local grain elevator.
